Index of Authors

Numerals followed by the letter A refer to Abstracts of Communications read at Meetings for Original Communications of The Nutrition Society

Abdel-Wahab, Y. H. A. see *O'Harte, F. P. M.* 161A
Abumrad, Naji N., Kim, Soojin & Molina, Patricia E. Regulation of gut glutamine metabolism: role of hormones and cytokines 525–533
Abumuhana, O. M. see *Barnard, M. L.* 181A
Acheson, K. J., Décombaz, J., Piguet-Welsch, C., Montigon, F., Decarli, B., Bartholdi, I. & Fern, E. B. Changes in energy expenditure, glucose-induced thermogenesis and protein turnover during short-term head-down-tilt conditions 20A
Adams, C. see *Taylor, E. J.* 645–656
Adams, J. E. see *Withers, D. J.* 113A
Adolph, A. see *Butte, N.* 22A
Ager Jr, Arba L. see *Levander, Orville A.* 475–487
Agis-Torres, A., López-Oliva, M. E., Únzaga, M. T. & Muñoz-Martínez, E. Recombinant human growth hormone changes the intrinsic sex-effect differences on body composition in mice 76A
Ait-Yahia, D. see *Prost, J.* 7A
Allen, M. see *Forrester, T.* 87A
Allen, M. see *Forrester, T.* 88A
Allison, S. P. Cost-effectiveness of nutritional support in the elderly 693–699
Amarri, S., Coward, W. A., Harding, M. & Weaver, L. T. Importance of measuring CO_2 production rate in ^{13}C breath tests 111A
Amiel, Stephanie A. Organ fuel selection: brain 151–155
Anderson, Annie S., Lean, M. E. J., Bush, H., Bradby, H. & Williams, R. Macronutrient intake in South Asian and Italian women in the West of Scotland 203A
Andrews, J. F. Comparative studies on programmes for management of energy supply: torpor, pre-winter fattening and migration 301–315
Andrews, J. F. see *McDevitt, R. M.* 31A
Antfang, V. see *McNeill, G.* 151A
Antoine, J. M. see *Himaya, A.* 55A
Arribi, Z. see *Prost, J.* 7A
Ascott, Mary B. C., Pollard, Lucie & Sanders, T. A. B. Effects of elaidic acid (18:1 *n*-9 *trans*) and oleic acid (18:1 *n*-9 *cis*) on plasma and hepatic cholesterol concentrations in the hamster 148A
Ashwell, M. A. The need for a new shape chart for assessing the risks of obesity 86A
Atgié, C., D'Allaire, F., Simard, P.-M., Mauriège, P. & Bukowiecki, L. J. The physiological function of β_1- and β_3-adrenoceptors in rat brown adipocytes 9A
Atgié, C. see *Bukowiecki, L. J.* 30A
Azab, S. G. see *Sadek, M. M.* 68A
Azzopardi, D. see *Thomas, E. L.* 183A
Badetti, C. see *Manelli, J. C.* 27A
Bakkour, Z., Laouari, D. & Kleinknecht, C. Synthesis and degradation of hepatic glycogen in uraemic rats 35A
Balage, M. see *Bornes, F.* 33A
Baldwin, C. see *Hardiman, A. K.* 107A
Bangu, N. see *Malone, F. J.* 190A
Baras, P. see *Han, T. S.* 152A
Barnard, M. L., Frost, G., Thomas, E. L., Schwieso, J. E., Bell, J. D., Hajnal, J. V., Saeed, N., Abumuhana, O. M. & Bloom, S. R. Body-fat distribution and interaction with coronary heart disease risk 181A
Barnard, M. L. see *Bell, J. D.* 155A
Barnard, M. L. see *Thomas, E. L.* 158A
Barnard, M. L. see *Thomas, E. L.* 183A
Barnard, M. L., Thomas, E. L., Schwieso, J. E., Hajnal, J. V., Frost, G., Saeed, N., Bloom, S. R. & Bell, J. D. Analysis of body-fat distribution by magnetic resonance imaging and impact on the metabolic risk factor profile 159A
Barnett, C. R. see *Boyd, A. C.* 188A
Barnett, C. R. see *O'Harte, F. P. M.* 161A
Bartholdi, I. see *Acheson, K. J.* 20A
Basha, H. M. see *Shalaby, M. M.* 106A
Bates, C. see *Hughes, J. M.* 631–643
Baverel, Gabriel, Ferrier, Bernard & Martin, Mireille Fuel selection by the kidney: adaptation to starvation 197–212
Beath, S. V. see *Spray, C. H.* 108A
Beattie, John H. see *Bremner, Ian* 489–499
Beaufrere, B. see *Boirie, Y.* 58A
Beck, Melinda A. see *Levander, Orville A.* 475–487
Bell, J. D., Barnard, M. L., Dagnelie, P. D., Thomas, E. L. & Cunnane, S. The effects of fish oil supplementation on lipoprotein composition and structure 155A
Bell, J. D. see *Barnard, M. L.* 159A
Bell, J. D. see *Barnard, M. L.* 181A
Bell, J. D. see *Thomas, E. L.* 158A
Bell, J. D. see *Thomas, E. L.* 183A
Bell, P. M. see *Boyd, A. C.* 188A
Belleville, J. see *Mekki, K.* 54A
Belleville, J. see *Prost, J.* 7A
Belton, N. R. see *Payne, J. A.* 16A
Bengtsson-Olivecrona, G. see *Hocquette, J. F.* 42A
Bennett, F. see *Forrester, T.* 87A
Bennett, F. see *Forrester, T.* 88A
Bennett, T., Cashman, K. & Flynn, A. The effect of oxalate and citrate on calcium absorption in the rat 186A
Bennett, T., Harrington, M., Cashman, K. & Flynn, A. The effect of dietary casein on calcium absorption from a purified diet in the rat 193A

Bernini, V. see *Manelli, J. C.* 27A

Index of Subjects

Numerals followed by the letter A refer to Abstracts of Communications read at Meetings for Original Communications of The Nutrition Society

Adipose tissue
An *in vivo* study of the relationship between diet and adipose-tissue composition **54,** 158A, 1995
Glutamine metabolism in ten different adipose depots of adult guinea pigs after feeding, fasting and exercise **54,** 65A, 1995
Lipoprotein lipase activity in bovine and ovine adipose tissue explants: effects of insulin and/or dexamethasone **54,** 40A, 1995
Lipoprotein lipase activity in muscular and adipose tissues from normal and double-muscled growing calves **54,** 42A, 1995
Nutritional manipulation of perirenal adipose tissue development in hand-reared postnatal lambs **54,** 43A, 1995
Physiological interactions between proliferating lymphocytes and adjacent adipose tissue **54,** 29A, 1995
Selective *in vivo* and *in vitro* mobilization of individual fatty acids during fat store depletion **54,** 37A, 1995
The new β3-agonist CL 316 243 decreases plasma glucose levels and markedly stimulates glucose uptake in brown and white adipose tissues **54,** 30A, 1995

Adrenaline
Fatty acid turnover and oxidation during starvation and in response to infused adrenaline in man **54,** 51A, 1995

Adrenergic agonists
Modifications in the lipolytic response to β_1, β_2 and β_3-adrenergic agonists after the administration of a non-selective β-agonist **54,** 8A, 1995

Adrenergic stimulation
Alpha-2 adrenergic stimulation and resting energy expenditure in menopausal women before and during oestrogen therapy **54,** 10A, 1995

Adrenoceptors
The physiological function of β_1 and β_3-adrenoceptors in rat brown adipocytes **54,** 9A, 1995

Aflatoxins
Food consumption and energy metabolism of *Spodoptera littoralis* Boisdoval (Lepidoptera, Noctuidae), feeding on an aflatoxin-containing diet **54,** 25A, 1995
Protein metabolism in *Spodoptera littoralis* Boisdoval (Lepidoptera, Noctuidae) and its response to some aflatoxins **54,** 68A, 1995

Africa
Investing in nutrition at the national level: an African perspective **54,** 367, 1995

Ageing
Some nutritional aspects of ageing in dogs and cats **54,** 645, 1995

β-Agonist
The new β3-agonist CL 316 243 decreases plasma glucose levels and markedly stimulates glucose uptake in brown and white adipose tissues **54,** 30A, 1995

AIDS
Thiamin status of people with AIDS **54,** 107A, 1995

Amino acid intake
Portal appearance of orally administered free and peptide-bound amino acids in rats **54,** 56A, 1995
The influence of starvation and amino acid administration on whole-body protein kinetics in obese adults **54,** 57A, 1995

Ammonia
Metabolic implications of ammonia production in the ruminant **54,** 549, 1995

Analgesia
Postoperative analgesia, stress response and urinary nitrogen excretion after upper abdominal surgery **54,** 106A, 1995

Animal models
How food preferences are learned: laboratory animal models **54,** 419, 1995

Anorexia nervosa
Body composition and physiological measures of fitness during re-feeding of anorexia nervosa patients **54,** 114A, 1995

Anthropometry
Comparison of three simple methods for the detection of malnutrition **54,** 115A, 1995
Measuring the height of critically ill patients in bed **54,** 116A, 1995
Waist circumference identifies cardiovascular risk factors **54,** 172A, 1995
Waist circumference indicates the need for weight management **54,** 180A, 1995
Waist circumference predicts intra-abdominal fat mass better than waist:hip ratio in women **54,** 152A, 1995

Antioxidants
Cytotoxic effects of cholesterol oxides and the potentially protective properties of α-tocopherol and β-carotene in rat kidney cells in culture **54,** 165A, 1995
Plasma antioxidant status in Peripheral Arterial Disease **54,** 92A, 1995
Plasma lutein, lycopene and β-carotene levels in smokers and non-smokers following vegetable supplements **54,** 170A, 1995

Plasma tocopherols, carotenoids and antioxidant activity of neonates **54**, 169A, 1995
Protective effect of carotenoids against UVA-light-induced oxidative stress in rat kidney cells in culture **54**, 166A, 1995
The effect of dietary α-tocopherol, curcumin and eugenol on lipid peroxidation in rat tissues **54**, 184A, 1995
The effect of *in vitro* and *in vivo* supplementation with lutein on LDL oxidation *in vitro* **54**, 168A, 1995

Arginine
Diurnal variation of plasma glutamine and arginine in normal and fasting subjects **54**, 118A, 1995
Requirement for both glutamine and arginine by proliferating lymphocytes **54**, 123A, 1995

Atherosclerosis
Intrauterine and postnatal influences on the biochemical antecedents of atherosclerotic vascular disease in children **54**, 87A, 1995

Basal metabolic rate
Liver and kidney volume and their relationship to metabolic rate at rest **54**, 151A, 1995

Birth weight
The relationship between women's birth weight and their current intra-abdominal fat mass **54**, 182A, 1995

Blood
Manipulation of postprandial triacylglycerol concentration and coagulation factor VII activity with low-fat diet and/or fish-oil supplementation **54**, 89A, 1995

Blood amino acids
Portal appearance of orally administered free and peptide-bound amino acids in rats **54**, 56A, 1995

Blood biochemistry
Serum cholesterol levels in rats fed on high-fat diets do not correlate with serum arginine levels **54**, 120A, 1995

Blood clotting
Long-chain but not medium chain triacylglycerols increase factor VII coagulant activity **54**, 147A, 1995
Postprandial triacylglycerolaemia and coagulation factor VII activity following meals containing varying proportions of olive oil **54**, 154A, 1995

Blood lipids
Origin of the early postprandial triacylglycerol peak **54**, 53A, 1995
Plasma lipoprotein composition and amounts in patients with chronic renal failure on haemodialysis **54**, 54A, 1995
Regulation of the plasma non-esterified fatty acid concentration after meals **54**, 52A, 1995
The effect of 13 weeks' endurance running training followed by 9 d detraining on fasting and postprandial triacylglycerol concentrations **54**, 143A, 1995
The effects of meal frequency on postprandial plasma triacylglycerol and non-esterified fatty acid concentrations **54**, 49A, 1995
The origin of plasma non-esterified fatty acids in the postprandial period **54**, 144A, 1995

Blood pressure
Intrauterine and postnatal influences on blood pressure in childhood **54**, 88A, 1995

Body composition
A validation of measurements of fat mass by dual energy X-ray absorptiometry against direct analysis in an infant model **54**, 73A, 1995
Analysis of body-fat distribution by magnetic resonance imaging and impact on the metabolic risk factor profile **54**, 159A, 1995
Body composition and physiological measures of fitness during re-feeding of anorexia nervosa patients **54**, 114A, 1995
Body composition changes after vertical band gastroplasty in obese females **54**, 95A, 1995
Body Mass Index, body composition and age in rural Nepali men and women **54**, 84A, 1995
Body-fat distribution and interaction with coronary heart disease risk **54**, 181A, 1995
Changes in body composition in response to chemotherapy in patients with acute myeloid leukaemia **54**, 100A, 1995
Non-invasive characterization of neonatal adipose-tissue by ^{13}C magnetic resonance spectroscopy **54**, 183A, 1995
Recombinant human growth hormone changes the intrinsic sex-effect differences on body composition in mice **54**, 76A, 1995
Relationship between muscle thickness measured using ultrasound and fat-free mass measured with dual energy X-ray absorptiometry (DEXA) **54**, 113A, 1995
Review of Macronutrient Metabolism Group Workshop **54**, 569, 1995
The relationship between women's birth weight and their current intra-abdominal fat mass **54**, 182A, 1995
Time course of the effect of diets rich in *n*-6 or *n*-3 polyunsaturated fatty acids on serum cholesterol levels, liver weights and adipose deposition in the rat **54**, 45A, 1995
Waist circumference predicts intra-abdominal fat mass better than waist:hip ratio in women **54**, 152A, 1995

Bone
Copper supplementation and bone-mineral density in middle-aged women **54**, 191A, 1995
Excretion of urinary pyridinium crosslinks in healthy young adults: inter- and intra-individual variations and effects of sodium **54**, 192A, 1995

Brain
Organ fuel selection: brain **54**, 151, 1995

Bread
Bioavailability of pteroylglutamic acid in bread in human subjects **54**, 195A, 1995

Breast-feeding
Breast-feeding: matching supply with demand in human lactation **54**, 401, 1995
Maternal nutrition and the regulation of milk synthesis **54**, 379, 1995
The relationship between breast-feeding and infant health and development **54**, 407, 1995
Urea kinetics in normal breast-fed infants measured in their home **54**, 91A, 1995
Breath tests
Importance of measuring CO_2 production rate in ^{13}C breath tests **54**, 111A, 1995
Brown adipose tissue
Effect of maternal glucose infusion during late gestation on brown adipose tissue and liver iodothyronine 5′deiodinase activity in the newborn lamb **54**, 32A, 1995
Fuel selection in brown adipose tissue **54**, 39, 1995
Seasonal changes of mass and lipid droplet size in brown adipose tissue of the Pygmy shrew (*Sorex minutus*) **54**, 31A, 1995
The physiological function of β_1 and β_3-adrenoceptors in rat brown adipocytes **54**, 9A, 1995

Cafeteria feeding
Lipid and carbohydrate utilization in a diet-induced model of obesity **54**, 156A, 1995
Calcium
The effect of dietary casein on calcium absorption from a purified diet in the rat **54**, 193A, 1995
The effect of oxalate and citrate on calcium absorption in the rat **54**, 186A, 1995
Cancer
The effect of dietary fatty acid composition on postprandial glycogen and lipid synthesis in tumour-bearing rats **54**, 125A, 1995
The effect of intensive dietary counselling on the nutritional status of patients with head and neck cancer undergoing radiotherapy **54**, 163A, 1995
Carbohydrate homeostasis
Carbohydrate homeostasis: the principle of macronutrient fuel selection in the growing rat allowed three dietary choices **54**, 69A, 1995
Carbohydrate intake
Effect of carbohydrate overfeeding and underfeeding on *de novo* lipogenesis and insulin levels **54**, 47A, 1995
Carbon dioxide
Importance of measuring CO_2 production rate in ^{13}C breath tests **54**, 111A, 1995
Cardiac rehabilitation
Differences between men and women after cardiac rehabilitation: an assessment of dietary compliance, nutritional knowledge and dietary perceptions **54**, 157A, 1995
Carnitine
Free and total carnitine concentrations in continuous ambulatory peritoneal dialysis patients **54**, 4A, 1995
Carotenoids
Protective effect of carotenoids against UVA-light-induced oxidative stress in rat kidney cells in culture **54**, 166A, 1995
The location of a carotenoid in a lipoprotein is a function of its polarity **54**, 167A, 1995
Casein
The effect of dietary casein on calcium absorption from a purified diet in the rat **54**, 193A, 1995
Catering
How do caterers decide on portion sizes? **54**, 199A, 1995
Cell culture
Influence of cell culture conditions on diet-induced changes in lymphocyte fatty acid composition **54**, 124A, 1995
Cellular fuel selection
Cellular aspects of fuel mobilization and selection in white adipocytes **54**, 49, 1995
Energy substrates for the rumen epithelium **54**, 95, 1995
Fatty acid transport and fatty acid-binding proteins **54**, 23, 1995
Fuel selection at the level of mitochondria in mammalian tissues **54**, 11, 1995
Fuel selection in brown adipose tissue **54**, 39, 1995
Fuel selection in intestinal cells **54**, 83, 1995
Fuel selection, muscle fibre **54**, 107, 1995
Fuel utilization by cells of the immune system **54**, 65, 1995
Cerebral palsy
Nutritional concerns of carers for, and nutritional status of, individuals with cerebral palsy in a residential home **54**, 82A, 1995
Chemotherapy
Changes in body composition in response to chemotherapy in patients with acute myeloid leukaemia **54**, 100A, 1995
Childhood
An effective procedure for changing food preferences in 5–7-year-old children **54**, 441, 1995
Energy expenditure in lean and obese prepubertal 9–10 year old children **54**, 21A, 1995
Food patterns and nutrient intake in short-stature children **54**, 132A, 1995
Intrauterine and postnatal influences on blood pressure in childhood **54**, 88A, 1995
Intrauterine and postnatal influences on the biochemical antecedents of atherosclerotic vascular disease in children **54**, 87A, 1995
Parental influences on children's diets **54**, 747, 1995
Validation of a food-frequency questionnaire in a small sample of children aged 12–24 months **54**, 128A, 1995
Cholesterol
An investigation of the intracellular location of cholesterol oxidation products in Swiss albino 3T3 cells in culture **54**, 185A, 1995
Blood cholesterol and health in persons aged 25–45 years **54**, 204A, 1995

Effects of elaidic acid (18:1 *n*-9 *trans*) and oleic acid (18:1 *n*-9 *cis*) on plasma and hepatic cholesterol concentrations in the hamster **54**, 148A, 1995
Feeding cholesterol blunts the proliferative effect of dietary guar gum **54**, 2A, 1995
The effects of dietary change on serum cholesterol **54**, 601, 1995

Citric acid
The effect of oxalate and citrate on calcium absorption in the rat **54**, 186A, 1995

Clinical audit
Changes in enteral feeding: a positive response to clinical audit **54**, 104A, 1995

Companion animals
Some nutritional aspects of ageing in dogs and cats **54**, 645, 1995

Complex carbohydrates
Digestion of complex carbohydrates in infants **54**, 71A, 1995

Copper
Copper and zinc metabolism in health and disease: speciation and interactions **54**, 489, 1995
Copper supplementation and bone-mineral density in middle-aged women **54**, 191A, 1995

Cortisol
The role of cortisol in regulation of lipolysis in normal subjects after an overnight fast **54**, 145A, 1995

Creatine
Factors influencing creatine retention in man **54**, 141A, 1995

Critical illness
Measuring the height of critically ill patients in bed **54**, 116A, 1995
The insulin-like growth factors in critical illness: pathophysiology and therapeutic potential **54**, 591, 1995

Crop production
Pattern of production of selected crops and their influence on child nutrition in Malawi **54**, 97A, 1995

Cryogenic storage
The stability of plasma vitamin C during storage in cryo-bio straws in liquid nitrogen and in metaphosphoric acid at −70° over a 16-month period **54**, 187A, 1995

Cytokines
Regulation of gut glutamine metabolism: role of hormones and cytokines **54**, 525, 1995

Cytotoxicity
Cytotoxic effects of cholesterol oxides and the potentially protective properties of α-tocopherol and β-carotene in rat kidney cells in culture **54**, 165A, 1995

DEXA
Relationship between muscle thickness measured using ultrasound and fat-free mass measured with dual energy X-ray absorptiometry (DEXA) **54**, 113A, 1995

Dexamethasone
Lipoprotein lipase activity in bovine and ovine adipose tisue explants: effects of insulin and/or dexamethasone **54**, 40A, 1995

Diabetes mellitus
Energy expenditure and carbohydrate flux in type 1 (insulin-dependent) diabetics **54**, 162A, 1995
Nutritional influences on pancreatic development and potential links with non-insulin-dependent diabetes **54**, 345, 1995

Dialysis
Energy metabolism in patients treated by continuous ambulatory peritoneal dialysis (CAPD) **54**, 112A, 1995
Free and total carnitine concentrations in continuous ambulatory peritoneal dialysis patients **54**, 4A, 1995
Plasma lipoprotein composition and amounts in patients with chronic renal failure on haemodialysis **54**, 54A, 1995

Diarrhoea
Enteral-feeding-related diarrhoea: proposed causes and possible solutions **54**, 579, 1995

Dietary advice
Compliance with dietary advice directed towards increasing the carbohydrate:fat ratio of the everyday diet **54**, 79A, 1995

Dietary counselling
Development of a food protein atlas as an educational tool in dietary counselling of renal patients **54**, 164A, 1995
The effect of intensive dietary counselling on the nutritional status of patients with head and neck cancer undergoing radiotherapy **54**, 163A, 1995

Dietary intake
An *in vivo* study of the relationship between diet and adipose-tissue composition **54**, 158A, 1995
Current selenium content of foods and an estimation of average intake in the United Kingdom **54**, 131A, 1995
The effects of dietary change on serum cholesterol **54**, 601, 1995

Dietary intervention
A feasibility study of a monounsaturated fatty-acid-rich diet in middle-aged subjects **54**, 134A, 1995

Dietary survey
The British National Diet and Nutrition Survey of people aged 65 years or over: protocol and feasibility study **54**, 631, 1995
Validation of methodology employed in the diet and lifestyle survey of Irish and West Virginian women **54**, 177A, 1995

Diet-related risks
Unrealistic optimism about diet-related risks: implications for interventions **54**, 737, 1995

Dissociated diet
Effects of the dissociation of carbohydrates and lipid-protein foods in the diet on 24-h substrate oxidation in moderately obese women **54**, 70A, 1995

Diurnal pattern
Diurnal cycling in urea-nitrogen hydrolysis **54,** 137A, 1995
Docosahexaenoic acid
Docosahexaenoic acid (DHA) and visual function in infants with fat malabsorption secondary to liver disease **54,** 108A, 1995
Doubly-labelled water
^{2}H and ^{18}O natural abundance variations and their consequences in the doubly-labelled water measurement of energy expenditure **54,** 15A, 1995
Physical Activity Level in free-living persons measured by doubly-labelled water **54,** 14A, 1995
Dyslipophobia
Dyslipophobias: a view of the psychopathologies involved and the hazards of construing anorexia nervosa and bulimia nervosa as 'eating disorders' **54,** 701, 1995
Dyslipoproteinaemia
Prevalence of dyslipoproteinaemias in patients with liver disease: impact of cause, clinical stage and nutritional status **54,** 78A, 1995

Eating disorders
Dyslipophobias: a view of the psychopathologies involved and the hazards of construing anorexia nervosa and bulimia nervosa as 'eating disorders' **54,** 701, 1995
Is obesity an eating disorder? **54,** 721, 1995
Practical management of eating disorders **54,** 711, 1995
Elderly
An evaluation of the feasibility of sip-feed supplementation in undernourished, acutely sick, elderly patients **54,** 135A, 1995
Changes in pattern of nutrient intake with advancing age in a healthy Irish population **54,** 202A, 1995
Cost-effectiveness of nutritional support in the elderly **54,** 693, 1995
Effects of exercise training in the elderly: impact of progressive-resistance training on skeletal muscle and whole-body protein metabolism **54,** 665, 1995
Energetic cost of protein metabolism in young and elderly healthy humans **54,** 58A, 1995
Energy balance and health in SENECA participants **54,** 617, 1995
Functional ability and nutritional status of free-living elderly people **54,** 677, 1995
The British National Diet and Nutrition Survey of people aged 65 years or over: protocol and feasibility study **54,** 631, 1995
Total energy expenditure, basal metabolic rate and physical activity plus thermogenesis in a group of free-living elderly men aged over 75 years **54,** 23A, 1995
Energy balance
Energy balance and health in SENECA participants **54,** 617, 1995
Underfeeding by reduction in fat or carbohydrate intake: effects on energy expenditure, macronutrient oxidation and subsequent food intake in lean men **54,** 160A, 1995
Energy expenditure
^{2}H and ^{18}O natural abundance variations and their consequences in the doubly-labelled water measurement of energy expenditure **54,** 15A, 1995
Changes in energy expenditure, glucose-induced thermogenesis and protein turnover during short-term head-down-tilt conditions **54,** 20A, 1995
Components of total energy expenditure during refeeding in the rat **54,** 17A, 1995
De novo lipogenesis and energy expenditure before and after food restriction in morbid obesity **54,** 48A, 1995
Energy expenditure and carbohydrate flux in type 1 (insulin-dependent) diabetics **54,** 162A, 1995
Energy expenditure in lean and obese prepubertal 9–10 year old children **54,** 21A, 1995
Measuring energy expenditure in Polar explorers **54,** 19A, 1995
The 24 h energy expenditure and urinary catecholamines of healthy young men given medium-chain triacylglycerols incorporated into a typical "Western" diet: a dose–response study in a human respiratory chamber **54,** 146A, 1995
The measurement of energy expenditure in young children by the minute-by-minute heart-rate method: a validation study **54,** 16A, 1995
Total energy expenditure, basal metabolic rate and physical activity plus thermogenesis in a group of free-living elderly men aged over 75 years **54,** 23A, 1995
Total energy expenditure, net protein, carbohydrate and fat oxidation in pregnant and postpartum women **54,** 22A, 1995
Energy intake
Compliance with dietary advice directed towards increasing the carbohydrate:fat ratio of the everyday diet **54,** 79A, 1995
Could linoleate be a significant metabolic fuel during fluctuating but adequate energy intake? **54,** 44A, 1995
Dietary fat oxidation in lean and obese women: effect of energy status **54,** 50A, 1995
Effects of energy restriction and parity on exogenous glucose utilization in anoestrus post-partum suckled Charolais beef cows **54,** 74A, 1995
Energy metabolism
Energy metabolism in patients treated by continuous ambulatory peritoneal dialysis (CAPD) **54,** 112A, 1995
The role of glucose and pyruvate in the nutrition of preimplantation mouse embryos **54,** 3A, 1995
Variation of energy metabolism among ruminant muscles: low glucose utilization potential by oxidative muscles **54,** 33A, 1995

Energy requirement
Increased energy requirements during trypanosomiasis infection in goats **54**, 75A, 1995
Measuring individual energy requirement in infants: inaccuracy of predictive equations and validation of heart rate monitoring **54**, 109A, 1995

Enteral nutrition
Changes in enteral feeding: a positive response to clinical audit **54**, 104A, 1995
Enteral-feeding-related diarrhoea: proposed causes and possible solutions **54**, 579, 1995
Is steady-state plasma enrichment obtained through conventional enteral administration of stable isotope tracers? **54**, 61A, 1995
The use efficacy and monitoring of artificial nutritional support (ANS) in a teaching hospital **54**, 105A, 1995

Environment
Evolutionary and environmental influences on human lactation **54**, 391, 1995

Exercise
Assessment of physical fitness by submaximal exercise **54**, 13A, 1995
Effects of exercise training in the elderly: impact of progressive-resistance training on skeletal muscle and whole-body protein metabolism **54**, 665, 1995
The effect of 13 weeks' endurance running training followed by 9 d detraining on fasting and postprandial triacylglycerol concentrations **54**, 143A, 1995
The influence of treadmill walking on the lipaemic and metabolic responses to a high-fat meal in women aged 35 to 50 years **54**, 142A, 1995
What determines fuel selection in relation to exercise? **54**, 275, 1995

Experimental design
Recruitment bias to a randomized controlled trial of obesity treatment, and reasons for drop out **54**, 85A, 1995

Farm animals
Food preferences in farm animals: why don't they always choose wisely? **54**, 429, 1995

Fast food
An investigation of the oils used in fast-food outlets in Galway city **54**, 173A, 1995

Fat intake
An investigation of the oils used in fast-food outlets in Galway city **54**, 173A, 1995
Effects of low-fat versus high-fat meals on hunger ratings, plasma hormone and metabolite levels, and energy intakes at the next meal **54**, 55A, 1995
In smokers, is fat intake due to protein appetite? **54**, 80A, 1995
Manipulation of postprandial triacylglycerol concentration and coagulation factor VII activity with low-fat diet and/or fish-oil supplementation **54**, 89A, 1995
Origin of the early postprandial triacylglycerol peak **54**, 53A, 1995
Regulation of the plasma non-esterified fatty acid concentration after meals **54**, 52A, 1995
Serum cholesterol levels in rats fed on high-fat diets do not correlate with serum arginine levels **54**, 120A, 1995
The 24 h energy expenditure and urinary catecholamines of healthy young men given medium-chain triacylglycerols incorporated into a typical "Western" diet: a dose–response study in a human respiratory chamber **54**, 146A, 1995
The criteria by which two groups of consumers classified high, medium and low fat-containing foods **54**, 199A, 1995
The influence of treadmill walking on the lipaemic and metabolic responses to a high-fat meal in women aged 35 to 50 years **54**, 142A, 1995
The origin of plasma non-esterified fatty acids in the postprandial period **54**, 144A, 1995
The potential role of starch-rich foods in achieving national targets for dietary fat reduction **54**, 201A, 1995
Understanding fat preference and consumption: applications of behavioural sciences to a nutritional problem **54**, 453, 1995

Fat metabolism
Dietary fat oxidation in lean and obese women: effect of energy status **54**, 50A, 1995

Fatty acid binding proteins
Mechanisms underlying induction of fatty acid binding protein genes by peroxisome proliferators along the small intestine **54**, 6A, 1995

Fatty acid intake
A feasibility study of a monounsaturated fatty-acid-rich diet in middle-aged subjects **54**, 134A, 1995
Effects of elaidic acid (18:1 *n*-9 *trans*) and oleic acid (18:1 *n*-9 *cis*) on plasma and hepatic cholesterol concentrations in the hamster **54**, 148A, 1995
Long-chain but not medium chain triacylglycerols increase factor VII coagulant activity **54**, 147A, 1995
The blood pressure response of normotensive rats and rats with maternal-diet-induced hypertension to diets of differing fatty acid composition **54**, 138A, 1995
The effect of dietary fatty acid composition on postprandial glycogen and lipid synthesis in tumour-bearing rats **54**, 125A, 1995
The effect of dietary lipid manipulation on macrophage phospholipid fatty acid composition and membrane fluidity **54**, 121A, 1995
The effect of lipoproteins isolated from rats fed on different dietary lipids upon lymphocyte proliferation **54**, 119A, 1995
Time course of the effect of diets rich in *n*-6 or *n*-3 polyunsaturated fatty acids on serum cholesterol levels, liver weights and adipose deposition in the rat **54**, 45A, 1995

Trans fatty acid status of Irish food products **54**, 179A, 1995

Fatty acids
Fatty acid transport and fatty acid-binding proteins **54**, 23, 1995
Incorporation of fatty acids into macrophage lipids *in vitro* **54**, 5A, 1995
Selective *in vivo* and *in vitro* mobilization of individual fatty acids during fat store depletion **54**, 37A, 1995

Feed intake
Glutamine metabolism in ten different adipose depots of adult guinea pigs after feeding, fasting and exercise **54**, 65A, 1995

Feed preferences
Food preferences in farm animals: why don't they always choose wisely? **54**, 429, 1995
How food preferences are learned: laboratory animal models **54**, 419, 1995

Fish oil
Effects of dietary fish oil on metabolic responses induced by an oral fructose and glucose load in healthy adults **54**, 72A, 1995
Fish oil attenuates long-term enhancement of hepatic pyruvate dehydrogenase kinase activity by dietary saturated fat **54**, 38A, 1995
The effects of fish-oil supplementation on lipoprotein composition and structure **54**, 155A, 1995

Fitness
Rates of triacylglycerol and cholesterol synthesis and the effects of fitness **54**, 46A, 1995

Food atlas
Development of a food protein atlas as an educational tool in dietary counselling of renal patients **54**, 164A, 1995

Food choice
An effective procedure for changing food preferences in 5–7-year-old children **54**, 441, 1995
Diversity of diets amongst South Asian Muslims in Britain **54**, 133A, 1995
Looking for 'fresh' food: diet and lone parents **54**, 759, 1995
Parental influences on children's diets **54**, 747, 1995
Social influences on food choice and dietary change: a sociological perspective **54**, 729, 1995
Understanding fat preference and consumption: applications of behavioural sciences to a nutritional problem **54**, 453, 1995
Unrealistic optimism about diet-related risks: implications for interventions **54**, 737, 1995

Food fortification
Changes in folate status in response to pteroylglutamic (folic) acid supplements, folic acid-fortified foods, food folate and dietary advice **54**, 196A, 1995

Food-frequency questionnaire
Validation of a food-frequency questionnaire in a small sample of children aged 12–24 months **54**, 128A, 1995
Validation of methodology employed in the diet and lifestyle survey of Irish and West Virginian women **54**, 177A, 1995

Food intake
An assessment of the validity of the 7 d weighed records (7dWR) of food intake in urban and rural Mexican women **54**, 96A, 1995

Food labelling
Analysis of the readership, belief and usage of food label information amongst Irish shoppers **54**, 197A, 1995

Food photographs
The use of food photographs as a tool for quantifying food and nutrient intake by 24 h recall **54**, 178A, 1995

Food survey
Social status differences in biscuit, cake and confectionery consumption in north Glasgow **54**, 200A, 1995

The Gambia
Gastrointestinal disease, diarrhoea and growth faltering in Gambian infants **54**, 98A, 1995

Gastroplasty
Body composition changes after vertical band gastroplasty in obese females **54**, 95A, 1995

Genotype
Components of heat production in pigs: effects of stage of growth and genotype **54**, 18A, 1995

Gestation
Effect of maternal glucose infusion during late gestation on the metabolic and hormonal environment at parturition in sheep **54**, 93A, 1995

Glucose
Effect of maternal glucose infusion during late gestation on the metabolic and hormonal environment at parturition in sheep **54**, 93A, 1995

Glutaminase
Glutaminase (*EC* 3.5.1.2) and glutamine synthetase (*EC* 6.3.1.2) activities in the gastrointestinal tract of rats **54**, 122A, 1995

Glutamine
Diurnal variation of plasma glutamine and arginine in normal and fasting subjects **54**, 118A, 1995
Glutamine metabolism in ten different adipose depots of adult guinea pigs after feeding, fasting and exercise **54**, 65A, 1995
Regulation of gut glutamine metabolism: role of hormones and cytokines **54**, 525, 1995
Requirement for both glutamine and arginine by proliferating lymphocytes **54**, 123A, 1995

Glutamine synthetase
Glutaminase (*EC* 3.5.1.2) and glutamine synthetase (*EC* 6.3.1.2) activities in the gastrointestinal tract of rats **54**, 122A, 1995

Glutathione
The influence of sulphur amino acids and enzymes associated with synthesis and recycling of reduced glutathione in maintaining glutathione status after tumour necrosis factor α (TNF) injection in rats **54**, 90A, 1995

Glycation
Evaluation of the biological activity of monoglycated human insulin using the euglycaemic hyperinsulinaemic clamp technique in man **54**, 188A, 1995
Glycation of insulin and proinsulin occurs in the pancreatic islets of lean and spontaneously obese-diabetic mice **54**, 161A, 1995
Glycogen
Synthesis and degradation of hepatic glycogen in uraemic rats **54**, 35A, 1995
Growth faltering
Gastrointestinal disease, diarrhoea and growth faltering in Gambian infants **54**, 98A, 1995
Growth hormone
Growth hormone and exogenous glucose utilisation rates in multiple organ failure **54**, 110A, 1995
Metabolic and hormonal responses to starvation and incremental refeeding in sheep **54**, 77A, 1995
Recombinant human growth hormone changes the intrinsic sex-effect differences on body composition in mice **54**, 76A, 1995
Guar gum
Feeding cholesterol blunts the proliferative effect of dietary guar gum **54**, 2A, 1995

Health promotion
Blood cholesterol and health in persons aged 25–45 years **54**, 204A, 1995
Evaluation of a pilot community nutrition programme in the Western Health Board **54**, 176A, 1995
Evaluation of the Nutrition Education at Primary School (NEAPS) programme developed by the Departments of Health and Education, the Health Promotion Unit and the North West Health Board **54**, 174A, 1995
Process evaluation of a community nutrition post in order to examine the implementation of the Nutrition Health Promotion Framework for Action **54**, 175A, 1995
Waist circumference indicates the need for weight management **54**, 180A, 1995
Heart
The measurement of energy expenditure in young children by the minute-by-minute heart-rate method: a validation study **54**, 16A, 1995
Heat production
Components of heat production in pigs: effects of stage of growth and genotype **54**, 18A, 1995
Total and activity-related heat production of group-confined pigeons as affected by gender and space **54**, 24A, 1995
Hormones
Regulation of gut glutamine metabolism: role of hormones and cytokines **54**, 525, 1995
Hunger
Effects of low-fat versus high-fat meals on hunger ratings, plasma hormone and metabolite levels, and energy intakes at the next meal **54**, 55A, 1995

Hypertension
Pharmacological adrenalectomy during pregnancy abolishes maternal-diet-induced hypertension in the rat **54**, 140A, 1995
Rats with hypertension induced by *in utero* exposure to maternal low-protein diets, fail to increase blood pressure in response to a chronically high salt intake **54**, 139A, 1995
The blood pressure response of normotensive rats and rats with maternal-diet-induced hypertension to diets of differing fatty acid composition **54**, 138A, 1995

ICONS
Nutrition information and support for overseas members **54**, 565, 1995
Immigrants
Macronutrient intake in South Asian and Italian women in the West of Scotland **54**, 203A, 1995
Immunity
Fuel utilization by cells of the immune system **54**, 65, 1995
Infants
A validation of measurements of fat mass by dual energy X-ray absorptiometry against direct analysis in an infant model **54**, 73A, 1995
Digestion of complex carbohydrates in infants **54**, 71A, 1995
Measuring individual energy requirement in infants: inaccuracy of predictive equations and validation of heart rate monitoring **54**, 109A, 1995
Infusion catheters
Comparison of implanted ports with Broviac/Hickman-style tunnelled catheters for long-term home parenteral nutrition: the patient's view **54**, 103A, 1995
Insulin
Effects of dietary fish oil on metabolic responses induced by an oral fructose and glucose load in healthy adults **54**, 72A, 1995
Evaluation of the biological activity of monoglycated human insulin using the euglycaemic hyperinsulinaemic clamp technique in man **54**, 188A, 1995
Evidence of an association between blunted postprandial thermogenesis and insulin resistance **54**, 11A, 1995
Factors influencing creatine retention in man **54**, 141A, 1995
Glycation of insulin and proinsulin occurs in the pancreatic islets of lean and spontaneously obese-diabetic mice **54**, 161A, 1995
Insulin resistance in human pregnancy: a comparison of *in vivo* and *in vitro* measurement techniques **54**, 12A, 1995
Lipoprotein lipase activity in bovine and ovine adipose tissue explants: effects of insulin and/or dexamethasone **54**, 40A, 1995
Mechanisms underlying muscle insulin resistance in late pregnancy **54**, 34A, 1995
Insulin-like growth factors
The insulin-like growth factors in critical illness:

pathophysiology and therapeutic potential **54**, 591, 1995

Intestinal epithelium
Fuel selection in intestinal cells **54**, 83, 1995
Metabolic fuel selection by intestinal epithelium **54**, 157, 1995

Iodine
The effect of oral and intramuscular iodine supplementation on goitre and thyroid hormone status of Tanzanian schoolchildren **54**, 190A, 1995

Iron
Influence of sulphydryl content of meats on the *in vitro* dialysability of iron **54**, 194A, 1995
Interdependence of vitamin A and iron: an important association for programmes of anaemia control **54**, 501, 1995
Riboflavin–iron interactions with particular emphasis on the gastrointestinal tract **54**, 509, 1995

Ischaemic heart disease
Weight loss improves thrombotic and rheological risk factors for ischaemic heart disease **54**, 94A, 1995

Kidney
Fuel selection by the kidney: adaptation to starvation **54**, 197, 1995

Lavoisier Symposium
Introductory notes **54**, 1, 1995

Leucine
Effects of varying glucose:lipid ratios on leucine metabolism in patients receiving parenteral nutrition **54**, 62A, 1995
Modulation of leucine oxidation by variation of dietary protein and glucose supplementation **54**, 59A, 1995

Linoleic acid
Could linoleate be a significant metabolic fuel during fluctuating but adequate energy intake? **54**, 44A, 1995

Lipid synthesis
De novo lipogenesis and energy expenditure before and after food restriction in morbid obesity **54**, 48A, 1995
Effect of carbohydrate overfeeding and underfeeding on *de novo* lipogenesis and insulin levels **54**, 47A, 1995
Rates of triacylglycerol and cholesterol synthesis and the effects of fitness **54**, 46A, 1995
Recycling of the carbon skeleton of polyunsaturates during lipid synthesis in the neonatal rat brain **54**, 39A, 1995

Lipolysis
Modifications in the lipolytic response to β_1, β_2 and β_3-adrenergic agonists after the administration of a non-selective β-agonist **54**, 8A, 1995
The role of cortisol in regulation of lipolysis in normal subjects after an overnight fast **54**, 145A, 1995

Lipoprotein lipase
Lipoprotein lipase activity in muscular and adipose tissues from normal and double-muscled growing calves **54**, 42A, 1995
The effects of meal frequency on lipoprotein lipase activity **54**, 41A, 1995

Lipoproteins
The effects of fish-oil supplementation on lipoprotein composition and structure **54**, 155A, 1995
The location of a carotenoid in a lipoprotein is a function of its polarity **54**, 167A, 1995

Liver
Docosahexaenoic acid (DHA) and visual function in infants with fat malabsorption secondary to liver disease **54**, 108A, 1995
Effect of maternal glucose infusion during late gestation on brown adipose tissue and liver iodothyronine 5′deiodinase activity in the newborn lamb **54**, 32A, 1995
Fish oil attenuates long-term enhancement of hepatic pyruvate dehydrogenase kinase activity by dietary saturated fat **54**, 38A, 1995
Hepatic fuel selection **54**, 139, 1995
Metabolic implications of ammonia production in the ruminant **54**, 549, 1995
Prevalence of dyslipoproteinaemias in patients with liver disease: impact of cause, clinical stage and nutritional status **54**, 78A, 1995

Liver insufficiency
Resting metabolic expenditure in patients with end-stage liver insufficiency **54**, 27A, 1995

Lone parents
Looking for 'fresh' food: diet and lone parents **54**, 759, 1995

Longevity
McCay's hypothesis: undernutrition and longevity **54**, 657, 1995

Lutein
The effect of *in vitro* and *in vivo* supplementation with lutein on LDL oxidation *in vitro* **54**, 168A, 1995

Lymphocytes
Influence of cell culture conditions on diet-induced changes in lymphocyte fatty acid composition **54**, 124A, 1995
Physiological interactions between proliferating lymphocytes and adjacent adipose tissue **54**, 29A, 1995
Requirement for both glutamine and arginine by proliferating lymphocytes **54**, 123A, 1995
The effect of lipoproteins isolated from rats fed on different dietary lipids upon lymphocyte proliferation **54**, 119A, 1995

Lysine
Lysine utilization in growing pigs at three different levels of protein **54**, 64A, 1995

Macronutrient fuel selection
Carbohydrate homeostasis: the principle of macronutrient fuel selection in the growing rat allowed three dietary choices **54**, 69A, 1995

Macronutrients
Review of Macronutrient Metabolism Group Workshop **54**, 569, 1995
Underfeeding by reduction in fat or carbohydrate intake: effects on energy expenditure, macronutrient oxidation and subsequent food intake in lean men **54**, 160A, 1995
Macrophages
Incorporation of fatty acids into macrophage lipids *in vitro* **54**, 5A, 1995
The effect of dietary lipid manipulation on macrophage phospholipid fatty acid composition and membrane fluidity **54**, 121A, 1995
Magnetic resonance imaging
Analysis of body-fat distribution by magnetic resonance imaging and impact on the metabolic risk factor profile **54**, 159A, 1995
Malawi
Pattern of production of selected crops and their influence on child nutrition in Malawi **54**, 97A, 1995
Malnutrition
Comparison of three simple methods for the detection of malnutrition **54**, 115A, 1995
Evaluation of a nutrition risk scoring method **54**, 171A, 1995
Mammary gland
Substrate selection and oxygen uptake by the lactating mammary gland **54**, 165, 1995
Maternal nutrition
Pregnancy, parturition and neonatal development: interactions between nutrition and thyroid hormones **54**, 329, 1995
Maternal–offspring interactions
Breast-feeding: matching supply with demand in human lactation **54**, 401, 1995
Evolutionary and environmental influences on human lactation **54**, 391, 1995
Maternal nutrition and the regulation of milk synthesis **54**, 379, 1995
The relationship between breast-feeding and infant health and development **54**, 407, 1995
Meal frequency
The effects of meal frequency on lipoprotein lipase activity **54**, 41A, 1995
The effects of meal frequency on postprandial plasma triacylglycerol and non-esterified fatty acid concentrations **54**, 49A, 1995
Meat
Influence of sulphydryl content of meats on the *in vitro* dialysability of iron **54**, 194A, 1995
Vitamin D activity of meat **54**, 130A, 1995
Menopause
Alpha-2 adrenergic stimulation and resting energy expenditure in menopausal women before and during oestrogen therapy **54**, 10A, 1995
Metabolic fuel selection
Introductory notes **54**, 1, 1995
Metabolic regulation
General integration and regulation of metabolism at the organ level **54**, 213, 1995
Metabolic fuel selection: general integration at the whole-body level **54**, 317, 1995
Mexico
An assessment of the validity of the 7 d weighed records (7dWR) of food intake in urban and rural Mexican woman **54**, 96A, 1995
Micronutrients
Iron–zinc and calcium–Fe interactions in relation to Zn and Fe absorption **54**, 465, 1995
Milk
Postprandial protein utilization in normal adults. 1. Milk protein measured in the steady state **54**, 60A, 1995
Postprandial protein utilization in normal adults. II. Milk protein measured in the non-steady state **54**, 63A, 1995
Minerals
Iron–zinc and calcium–Fe interactions in relation to Zn and Fe absorption **54**, 465, 1995
Mitochondria
Fuel selection at the level of mitochondria in mammalian tissues **54**, 11, 1995
Mouse embryos
The role of glucose and pyruvate in the nutrition of preimplantation mouse embryos **54**, 3A, 1995
Multiple organ failure
Growth hormone and exogenous glucose utilisation rates in multiple organ failure **54**, 110A, 1995
Muscle
Fuel selection, muscle fibre **54**, 107, 1995
Lipoprotein lipase activity in muscular and adipose tissues from normal and double-muscled growing calves **54**, 42A, 1995
Muscle fuel selection: effect of exercise and training **54**, 125, 1995
Variation of energy metabolism among ruminant muscles: low glucose utilization potential by oxidative muscles **54**, 33A, 1995
Muslims in Great Britain
Diversity of diets amongst South Asian Muslims in Britain **54**, 133A, 1995

Neonates
Non-invasive characterization of neonatal adipose-tissue by ^{13}C magnetic resonance spectroscopy **54**, 183A, 1995
Nutritional manipulation of perirenal adipose tissue development in hand-reared postnatal lambs **54**, 43A, 1995
Plasma tocopherols, carotenoids and antioxidant activity of neonates **54**, 169A, 1995
Recycling of the carbon skeleton of polyunsaturates during lipid synthesis in the neonatal rat brain **54**, 39A, 1995
Shivering is the main thermogenic mechanism in cold-exposed newborn pigs **54**, 26A, 1995
Nepal
Body Mass Index, body composition and age in rural Nepali men and women **54**, 84A, 1995
Nitrogen
Intestinal oligopeptide transport **54**, 519, 1995
Nutrient effects
Nutrient effects: post-absorptive interactions **54**, 253, 1995

Nutrient intake
Changes in pattern of nutrient intake with advancing age in a healthy Irish population **54,** 202A, 1995
Food patterns and nutrient intake in short-stature children **54,** 132A, 1995
Macronutrient intake in South Asian and Italian women in the West of Scotland **54,** 203A, 1995
The use of food photographs as a tool for quantifying food and nutrient intake by 24 h recall **54,** 178A, 1995
Nutrifil
Evaluation of Nutrifil, a nutritionally complete supplementary food, with respect to acceptability and weight gain in malnourished children in Katale Refugee Camp, Zaire **54,** 189A, 1995
Nutrition education
Analysis of the readership, belief and usage of food label information amongst Irish shoppers **54,** 197A, 1995
Evaluation of a pilot community nutrition programme in the Western Health Board **54,** 176A, 1995
Evaluation of the Nutrition Education at Primary School (NEAPS) programme developed by the Departments of Health and Education, the Health Promotion Unit and the North West Health Board **54,** 174A, 1995
Process evaluation of a community nutrition post in order to examine the implementation of the Nutrition Health Promotion Framework for Action **54,** 175A, 1995
Nutrition information
Nutrition information and support for overseas members **54,** 565, 1995
Nutrition knowledge
The criteria by which two groups of consumers classified high, medium and low fat-containing foods **54,** 199A, 1995
Nutrition priorities
Investing in nutrition at the national level: an African perspective **54,** 367, 1995
Nutrition in overseas aid: the investors' perspective **54,** 357, 1995
Priorities for nutrition interventions in reproductive health: a bilateral agency perspective **54,** 361, 1995
Nutrition risk score
Evaluation of a nutrition risk scoring method **54,** 171A, 1995
Nutritional screening: evaluation and implementation of a simple nutrition risk score **54,** 101A, 1995
Nutritional knowledge
Differences between men and women after cardiac rehabilitation: an assessment of dietary compliance, nutritional knowledge and dietary perceptions **54,** 157A, 1995
Nutritional management
Practical management of eating disorders **54,** 711, 1995
Nutritional status
Functional ability and nutritional status of free-living elderly people **54,** 677, 1995
Nutritional concerns of carers for, and nutritional status of, individuals with cerebral palsy in a residential home **54,** 82A, 1995
Nutritional support
An evaluation of the feasibility of sip-feed supplementation in undernourished, acutely sick, elderly patients **54,** 135A, 1995
Cost-effectiveness of nutritional support in the elderly **54,** 693, 1995
Visual analogue scales: a validated tool for assessing nutritional need in head and neck cancer patients **54,** 117A, 1995

Obesity
Differential handling of substrates in rat strains that vary in their sensitivity to dietary obesity **54,** 36A, 1995
Effects of the dissociation of carbohydrates and lipid-protein foods in the diet on 24-h substrate oxidation in moderately obese women **54,** 70A, 1995
Is obesity an eating disorder? **54,** 721, 1995
Lipid and carbohydrate utilization in a diet-induced model of obesity **54,** 156A, 1995
The influence of starvation and amino acid administration on whole-body protein kinetics in obese adults **54,** 57A, 1995
The need for a new shape chart for assessing the risks of obesity **54,** 86A, 1995
Oligopeptides
Intestinal oligopeptide transport **54,** 519, 1995
Olive oil
Postprandial triacylglycerolaemia and coagulation factor VII activity following meals containing varying proportions of olive oil **54,** 154A, 1995
Oral dietary supplements
Two-phase randomized controlled clinical trial of oral dietary supplements in surgical patients: results of in-patient phase I **54,** 102A, 1995
Organ fuel selection
Fuel selection by the kidney: adaptation to starvation **54,** 197, 1995
Fuel selection in white adipose tissue **54,** 177, 1995
General integration and regulation of metabolism at the organ level **54,** 213, 1995
Hepatic fuel selection **54,** 139, 1995
Metabolic fuel selection by intestinal epithelium **54,** 157, 1995
Muscle fuel selection: effect of exercise and training **54,** 125, 1995
Organ fuel selection: brain **54,** 151, 1995
Substrate selection and oxygen uptake by the lactating mammary gland **54,** 165, 1995
The human epidermis **54,** 191, 1995
Organ size
Liver and kidney volume and their relationship to metabolic rate at rest **54,** 151A, 1995

Overseas aid
Nutrition in overseas aid: the investors' perspective **54,** 357, 1995
Oxalic acid
The effect of oxalate and citrate on calcium absorption in the rat **54,** 186A, 1995

Pancreas
Nutritional influences on pancreatic development and potential links with non-insulin-dependent diabetes **54,** 345, 1995
Parenteral nutrition
Comparison of implanted ports with Broviac/Hickman-style tunnelled catheters for long-term home parenteral nutrition: the patient's view **54,** 103A, 1995
Effects of varying glucose:lipid ratios on leucine metabolism in patients receiving parenteral nutrition **54,** 62A, 1995
The use efficacy and monitoring of artificial nutritional support (ANS) in a teaching hospital **54,** 105A, 1995
Parity
Effects of energy restriction and parity on exogenous glucose utilization in anoestrus post-partum suckled Charolais beef cows **54,** 74A, 1995
Peripheral artery disease
Plasma antioxidant status in Peripheral Arterial Disease **54,** 92A, 1995
Peroxidation
Impact of plant volatile oils upon enzymes involved in lipid peroxidation **54,** 150A, 1995
The effect of dietary α-tocopherol, curcumin and eugenol on lipid peroxidation in rat tissues **54,** 184A, 1995
Peroxisomes
Mechanisms underlying induction of fatty acid binding protein genes by peroxisome proliferators along the small intestine **54,** 6A, 1995
Physical activity level
Physical Activity Level in free-living persons measured by doubly-labelled water **54,** 14A, 1995
Physical fitness
Assessment of physical fitness by submaximal exercise **54,** 13A, 1995
Polar exploration
Measuring energy expenditure in Polar explorers **54,** 19A, 1995
Portion size
How do caterers decide on portion sizes? **54,** 199A, 1995
Postprandial thermogenesis
Evidence of an association between blunted postprandial thermogenesis and insulin resistance **54,** 11A, 1995
Pregnancy
Insulin resistance in human pregnancy: a comparison of *in vivo* and *in vitro* measurement techniques **54,** 12A, 1995
Mechanisms underlying muscle insulin resistance in late pregnancy **54,** 34A, 1995
Pharmacological adrenalectomy during pregnancy abolishes maternal-diet-induced hypertension in the rat **54,** 140A, 1995
Total energy expenditure, net protein, carbohydrate and fat oxidation in pregnant and postpartum women **54,** 22A, 1995
Pre-ruminants
Cold- and diet-induced thermogenesis in the pre-ruminant kid goat and lamb **54,** 28A, 1995
Protein intake
Effect of animal or vegetable protein intakes (100, 200 or 300 g casein or soya-bean protein/kg) on membrane hepatocyte very-low-density lipoprotein (VLDL) receptors **54,** 7A, 1995
Lysine utilization in growing pigs at three different levels of protein **54,** 64A, 1995
Modulation of leucine oxidation by variation of dietary protein and glucose supplementation **54,** 59A, 1995
Rats with hypertension induced by *in utero* exposure to maternal low-protein diets, fail to increase blood pressure in response to a chronically high salt intake **54,** 139A, 1995
Protein metabolism
Energetic cost of protein metabolism in young and elderly healthy humans **54,** 58A, 1995
Postprandial protein utilization in normal adults. 1. Milk protein measured in the steady state **54,** 60A, 1995
Postprandial protein utilization in normal adults. II. Milk protein measured in the non-steady state **54,** 63A, 1995
Protein requirements
Salvage of urea-nitrogen and protein requirements **54,** 535, 1995
Protein synthesis
Coordinated response of liver and muscle protein synthesis to fasting and refeeding in 12-month-old rats **54,** 136A, 1995
Protein turnover
Changes in energy expenditure, glucose-induced thermogenesis and protein turnover during short-term head-down-tilt conditions **54,** 20A, 1995
Muscle protein turnover in doublemuscled Belgian Blue bulls during reduced and subsequent adequate energy and protein intake **54,** 66A, 1995
Pteroylglutamic acid
Bioavailability of pteroylglutamic acid in bread in human subjects **54,** 195A, 1995
Changes in folate status in response to pteroylglutamic (folic) acid supplements, folic acid-fortified foods, food folate and dietary advice **54,** 196A, 1995
Pygmy shrew
Seasonal changes of mass and lipid droplet size in brown adipose tissue of the Pygmy shrew (*Sorex minutus*) **54,** 31A, 1995

Racing pigeons
Total and activity-related heat production of group-confined pigeons as affected by gender and space **54,** 24A, 1995

Recruitment bias
Recruitment bias to a randomized controlled trial of obesity treatment, and reasons for drop out **54,** 85A, 1995

Refeeding
Components of total energy expenditure during refeeding in the rat **54,** 17A, 1995
Coordinated response of liver and muscle protein synthesis to fasting and refeeding in 12-month-old rats **54,** 136A, 1995
Metabolic and hormonal responses to starvation and incremental refeeding in sheep **54,** 77A, 1995
Muscle protein turnover in doublemuscled Belgian Blue bulls during reduced and subsequent adequate energy and protein intake **54,** 66A, 1995

Reproduction
Priorities for nutrition interventions in reproductive health: a bilateral agency perspective **54,** 361, 1995
Whole-body fuel selection: 'reproduction' **54,** 283, 1995

Resting energy expenditure
Resting metabolic expenditure in patients with end-stage liver insufficiency **54,** 27A, 1995

Retina
Beneficial effects of plant volatile oils on the retinal lipids during ageing **54,** 149A, 1995

Riboflavin
Riboflavin–iron interactions with particular emphasis on the gastrointestinal tract **54,** 509, 1995

Risk factors
Body-fat distribution and interaction with coronary heart disease risk **54,** 181A, 1995
Waist circumference identifies cardiovascular risk factors **54,** 172A, 1995

Rumen epithelium
Energy substrates for the rumen epithelium **54,** 95, 1995

Ruminants
Whole-body fuel selection in ruminants: nutrient supply and utilization by major tissues **54,** 235, 1995

Salt
Rats with hypertension induced by *in utero* exposure to maternal low-protein diets, fail to increase blood pressure in response to a chronically high salt intake **54,** 139A, 1995

Selenium
Current selenium content of foods and an estimation of average intake in the United Kingdom **54,** 131A, 1995
Vitamin E and selenium: contrasting and interacting nutritional determinants of host resistance to parasitic and viral infections **54,** 475, 1995

Shape chart
The need for a new shape chart for assessing the risks of obesity **54,** 86A, 1995

Shivering
Shivering is the main thermogenic mechanism in cold-exposed newborn pigs **54,** 26A, 1995

Skin
The human epidermis **54,** 191, 1995

Smoking
In smokers, is fat intake due to protein appetite? **54,** 80A, 1995
Plasma lutein, lycopene and β-carotene levels in smokers and non-smokers following vegetable supplements **54,** 170A, 1995

Social class
Social status differences in biscuit, cake and confectionery consumption in north Glasgow **54,** 200A, 1995

Social influences
Social influences on food choice and dietary change: a sociological perspective **54,** 729, 1995

Sodium
Excretion of urinary pyridinium crosslinks in healthy young adults: inter- and intra-individual variations and effects of sodium **54,** 192A, 1995

***Spodoptera littoralis* Boisdoval**
Food consumption and energy metabolism of *Spodoptera littoralis* Boisdoval (Lepidoptera, Noctuidae), feeding on an aflatoxin-containing diet **54,** 25A, 1995
Protein metabolism in *Spodoptera littoralis* Boisdoval (Lepidoptera, Noctuidae) and its response to some aflatoxins **54,** 68A, 1995

Stable isotopes
A method for the isolation and derivatization of plasma taurine for use in stable isotope tracer kinetic studies **54,** 67A, 1995
Is steady-state plasma enrichment obtained through conventional enteral administration of stable isotope tracers? **54,** 61A, 1995

Starch
The potential role of starch-rich foods in achieving national targets for dietary fat reduction **54,** 201A, 1995

Starvation
Fatty acid turnover and oxidation during starvation and in response to infused adrenaline in man **54,** 51A, 1995

Substrate metabolism
Differential handling of substrates in rat strains that vary in their sensitivity to dietary obesity **54,** 36A, 1995

Supplementary feeding
Evaluation of Nutrifil, a nutritionally complete supplementary food, with respect to acceptability and weight gain in malnourished children in Katale Refugee Camp, Zaire **54,** 189A, 1995
The effect of oral and intramuscular iodine supplementation on goitre and thyroid hormone status of Tanzanian schoolchildren **54,** 190A, 1995

Surgery
Two-phase randomized controlled clinical trial of

oral dietary supplements in surgical patients: results of in-patient phase I **54**, 102A, 1995

Surgical stress
Postoperative analgesia, stress response and urinary nitrogen excretion after upper abdominal surgery **54**, 106A, 1995

Taurine
A method for the isolation and derivatization of plasma taurine for use in stable isotope tracer kinetic studies **54**, 67A, 1995

Thermogenesis
Cold- and diet-induced thermogenesis in the pre-ruminant kid goat and lamb **54**, 28A, 1995

Thiamin
Thiamin status of people with AIDS **54**, 107A, 1995

Thyroid hormones
Pregnancy, parturition and neonatal development: interactions between nutrition and thyroid hormones **54**, 329, 1995

***Trans* fatty acids**
Trans fatty acid status of Irish food products **54**, 179A, 1995

Trypanosomiasis
Increased energy requirements during trypanosomiasis infection in goats **54**, 75A, 1995

Tumour necrosis factor
The influence of sulphur amino acids and enzymes associated with synthesis and recycling of reduced glutathione in maintaining glutathione status after tumour necrosis factor α (TNF) injection in rats **54**, 90A, 1995

Undernutrition
Feeding, fasting and starvation: factors affecting fuel utilization **54**, 267, 1995
McCay's hypothesis: undernutrition and longevity **54**, 657, 1995
Nutritional screening: evaluation and implementation of a simple nutrition risk score **54**, 101A, 1995

Uraemia
Synthesis and degradation of hepatic glycogen in uraemic rats **54**, 35A, 1995

Urea
Diurnal cycling in urea-nitrogen hydrolysis **54**, 137A, 1995
Salvage of urea-nitrogen and protein requirements **54**, 535, 1995
Urea kinetics in normal breast-fed infants measured in their home **54**, 91A, 1995

Visual analogue scales
Visual analogue scales: a validated tool for assessing nutritional need in head and neck cancer patients **54**, 117A, 1995

Vitamin A
Interdependence of vitamin A and iron: an important association for programmes of anaemia control **54**, 501, 1995

Vitamin C
The stability of plasma vitamin C during storage in cryo-bio straws in liquid nitrogen and in metaphosphoric acid at −70° over a 16-month period **54**, 187A, 1995

Vitamin D
Vitamin D activity of meat **54**, 130A, 1995

Vitamin E
Vitamin E and selenium: contrasting and interacting nutritional determinants of host resistance to parasitic and viral infections **54**, 475, 1995

VLDL receptors
Effect of animal or vegetable protein intakes (100, 200 or 300 g casein or soya-bean protein/kg) on membrane hepatocyte very-low-density lipoprotein (VLDL) receptors **54**, 7A, 1995

Volatile oils
Beneficial effects of plant volatile oils on the retinal lipids during ageing **54**, 149A, 1995
Impact of plant volatile oils upon enzymes involved in lipid peroxidation **54**, 150A, 1995

Weight loss
Weight loss improves thrombotic and rheological risk factors for ischaemic heart disease **54**, 94A, 1995

White adipose tissue
Cellular aspects of fuel mobilization and selection in white adipocytes **54**, 49, 1995
Fuel selection in white adipose tissue **54**, 177, 1995

Whole-body fuel selection
Comparative studies on programmes for management of energy supply: torpor, pre-winter fattening and migration **54**, 301, 1995
Feeding, fasting and starvation: factors affecting fuel utilization **54**, 267, 1995
Metabolic fuel selection: general integration at the whole-body level **54**, 317, 1995
Nutrient effects: post-absorptive interactions **54**, 253, 1995
What determines fuel selection in relation to exercise? **54**, 275, 1995
Whole-body fuel selection in ruminants: nutrient supply and utilization by major tissues **54**, 235, 1995
Whole-body fuel selection: 'reproduction' **54**, 283, 1995

Winter
Comparative studies on programmes for management of energy supply: torpor, pre-winter fattening and migration **54**, 301, 1995

Zinc
Copper and zinc metabolism in health and disease: speciation and interactions **54**, 489, 1995
